

# California OES Weather Threat Briefing

Sunday, April 7, 2019  
9:00 AM PST

**Day 1:** Periods of heavy rain mainly along the northern coastal areas and the CA/OR border. Flooding possible along smaller creeks and streams. Areal flooding is possible in urban areas. There is also a threat of landslides and rock falls.

**National Weather Service**  
*Western Region Headquarters  
Regional Operations Center  
Salt Lake City, UT*

# **WEATHER KEY POINTS**

**04/07/19 - 04/13/19**

## **Sunday-Monday**

- An additional wet storm system will move across far northern CA
  - Periods of heavy rain mainly along the northern coastal areas and the CA/OR border
  - Flooding possible along smaller creeks and streams. Areal flooding is possible in urban areas. There is also a threat of landslides and rock falls.
- Gusty offshore winds develop across Southern CA and significantly raise high temperatures well into the 70s and 80s. The gusty winds may impact travel.
- Relative humidity will drop to 15 to 30 percent across portions of southern California creating elevated fire weather conditions

## **Tuesday**

- Slightly cooler temperatures return with snow levels dropping to 5500 feet in the northern areas. Snow may cause minor travel impacts over the Sierra.
- Gusty offshore winds continue across southern CA. The strongest winds of the week likely Tuesday Night in these areas.
- Strong winds also possible across the southern desert areas

## **Wednesday**

- Dry conditions across much of the state with no significant impacts. Cooler temperatures continue.
- Gusty winds continue across southern CA but begin to weaken

## **Thursday-Friday**

- A weak storm system will move across the state. Snow over the Sierra may cause minor travel impacts.

## **Saturday**

- Dry conditions across much of the state with no significant impacts
